SOUTHEAST FLORIDA NBEMS NET SCRIPT

STARTING THE NET

Good evening, this is **[your CALLSIGN and name]**, commencing the Southeast Florida NBEMS Net. I will be your Net Control Station. This Net is conducted for all amateurs who wish to learn and practice the techniques needed to pass information efficiently in a digital format. This net is conducted in a mixed mode format which means that both digital message and analog voice communications are acceptable, and that you need not have NBEMS software to participate in the net.

This is a directed net, which means that stations must be invited to transmit by Net Control. At this time, if you haven't already done so, please start your **FLDIGI** and **FLMSG.**

CALL FOR STATIONS

Instructions: record stations, status, if NBEMS capable, acknowledge each station

At this time, mobile or short of time stations, your CALLSIGN, name and if you're NBEMS capable.

Short of time stations are welcome to leave at their discretion.

At this time, all regular stations, your CALLSIGN, name and if you're NBEMS capable.

TRANSMIT TEST

At this time we will send a test transmission to check that your NBEMS system is operating correctly.

Any station who did not receive this transmission properly, your CALLSIGN please.

NET PROCESS

The following are some of the processes and guidelines we'll follow when sending and receiving messages:

- As directed, any station sending digital transmission, please say your CALLSIGN, MODE, LENGTH and TIME followed by "Wait for Message", then send you message.

- Please keep the message length to less than 1 minutes

- When complete, Net Control will ask each station to acknowledge successful receipt.

- Net Control may ask for a station to RELAY a message as needed.

- Net Control will ask for messages to be read.
